**Subject: Measures to counteract and contain the Covid-19 Virus spread.**

Following the agreement dated 14 March 2020 regulating the measures aimed to counteract and contain the spread of the COVID-19 Virus at workplaces, which has been mutually accepted by the Unions, the Employers' Associations and the Government, further fulfillments have been set to continue the production activities, including the possibility to reduce temporarily such productions.

With the aim to limit the presence of the working personnel, while maintaining operations, the PSA GP has set and shared with the local Port Authority the following actions, valid from 06.00 hours on Monday 16 March 2020:

1. Vessel operations: a maximum of 4 gangs will be deployed per each shift;
2. Rail operations: a maximum of 1 gang will be deployed per each shift;
3. Import/export documentation office/gate:
  - a. Export: the second vessel's acceptance on each service will be subject to the end of the commercial operations on the first vessel of the same service;
  - b. Import: no limitations;
  - c. Maximum passages per hour: 80 trucks per hour.

Such actions have been taken to avoid the complete production downtime and are aimed to support, as far as possible, the national logistic chain, without neglecting the vital necessity to safeguard the health of all employees and of all people who gravitate, because of their activities, around the PSA GP areas.

We are well aware of the difficulties that each single actor in the logistic chain will have to face in this scenario and we are grateful for the efforts already put in place and for those that will be necessary in the next period.

We trust that all parties involved will understand the effort put in place by our organization and that everyone, in turn, will adopt all possible actions to mitigate the negative consequences that we will have to face.

We are definitely available to schedule, by conference and video calls, all meetings that will be requested by the involved Associations with the aim to explain better the implementation of the measures actions taken from now onwards and in the next future, and glad and open to receive suggestions which could contribute to mitigate the effects in such a difficult period for the whole Country.

We wish to thank you for your usual cooperation and we take this chance to say that with the help of everyone: "Andrà tutto bene" (it will all workout).

Best regards,

Piero Fabiano
