# Covid-19: Keep freight moving freely in EU/extra EU

*30 March 2020*

**Uniontrasporti, in collaboration with the Chamber of Commerce of Bolzano, has published a report "The free flow of freight during the Covid-19 Emergency - Restrictions in European Member-States and extra-EU", with important information on the introduction of "green lanes" by the European Commission to keep freight moving freely amongst member-States and across extra-EU borders, and thereby maintaining operational the supply chains for essential goods and the Single Market open to all goods.**

The report outlines the set of measures prescribed by each member-State and those implemented extra-EU, with a link to an online Platform to check traffic conditions at the border crossings of each State: an interactive map updated in real-time.
