

Megaship docks in the Sampierdarena basin

08 May 2020

The Pilots of the Port of Genoa announced the successful mooring of the Liberian containership Agios Minas - 300 metres long, 40 metres wide and a deadweight tonnage of 73,000 dwt - at Gruppo Spinelli-Genoa Port Terminal's Ponte Etiopia.

Genoa, 8 May 2020 - To date, it ranks as the largest vessel to have sailed along the Sampierdarena navigation channel. The complexity of the manoeuvre required in advance a close analysis and assessment by the pilots, with the use of a ship manoeuvring simulator, in compliance with maximum safety regulations.

The successful accomplishment of the operation is also a great achievement on the part of the Spinelli terminal management group.
