

New Maersk liner service from Vado Gateway

06 March 2020

The MMX weekly liner service connecting the Mediterranean with Canada from Vado Gateway

The Maersk Nora is the first of the five MMX ships to set sail from the deep-sea container terminal. The 199-metre 2274-teu capacity containership docked at Vado Gateway after calling at the Ports of Tangiers Eastbound and Fos-Su-Mer/Marseilles, and will complete its journey with calls in Algeciras, Tangiers Wesbound and Montreal.

Following the completion of unloading operations in Vado Gateway, containers will be forwarded by rail to the inland terminals in Pioltello (Milan), Rubiera (Modena) and Padua. Operations commenced at the APM Terminals Vado Ligure-operated container terminal on 11 February with Maersk's weekly ME2 Mediterranean-Middle East-India liner service.
