

## **Signorini at the MIT: meetings on innovation and blockchain technology**

*23 March 2018*

**Meeting in Cambridge (Massachusetts) between Mr Signorini and Silvio Micali, Ford Professor of Engineering at the Massachusetts Institute of Technology, to discuss the positive impact of blockchain technology on the shipping industry, in terms of cost reduction, time savings and information security.**

Prof. Micali was recognized with the prestigious Turing Award (computer science), the Goedel Prize (theoretical computer science) and the RSA Prize (cryptography). He is a member of the National Academy of Sciences, of the United States National Academy of Engineering and of the American Academy of Arts e Sciences.
